HOW IT WORKS

- Same 4 meals every day; the options rotate, so the shopping is the same every week.
- I cook fresh (10–20 minutes), except pasta, which I cook for 2 days.
- The dessert is planned and already in the calories: it keeps the evening sweet cravings away.

IN THE KITCHEN

- **My shelf in the fridge** (pink tape): dairy, tomatoes, passata, whey. Nothing from it goes into your food.
- **Your food is cooked first**, with clean pans. I cut tomatoes last, on my own board, and my whey shaker stays separate.
- **Pasta for 2 days:** I weigh it dry (120 g for 2 portions), weigh it cooked, and split it in two boxes.
- **Saturday dinner** is my free meal: we can eat out or order, and you order following your rules.

DINNERS WE SHARE

- **Mon** salmon · **Wed** sea bass · **Fri** sea bream · **Sun** fish night.
- Same fish from the same order, same seasoning (lemon, garlic, thyme), cooked together in the air fryer. Your piece 180 g, mine ≈100 g cooked.
- I add potatoes on my plate; your dinner stays protein + veg + salad, as in your plan.
